Why is TED'S SHEDS your best value?

Direct questions from customers help explain the importance of quality in the selection of your portable storage building.

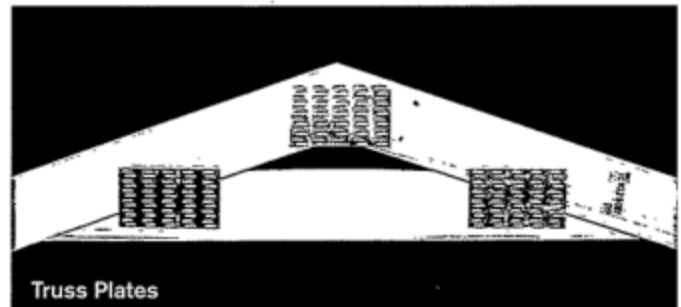

"What should I look for in a quality shed?"

Integrated construction, using the most durable materials and engineered fasteners, will satisfy the State of Florida Department of Community Affairs (DCA) building code and provide the greatest strength and long lasting service. TED'S SHEDS feature:

Roof Tie

- Framed construction of #2 grade Southern Yellow Pine, **not light weight Spruce or Fir.**
- Framing spaced in 16" or 24" increments, per customer preference.
- Heavy duty 4" x 6" corner post constructed of 3 - 2" x 4" studs with 1/2" plywood spacer for maximum strength and rigidity.
- Inside of siding coated white - for cleaner, brighter interior appearance (with most colors).

Truss Plates

"Does my shed meet Florida's hurricane codes?"

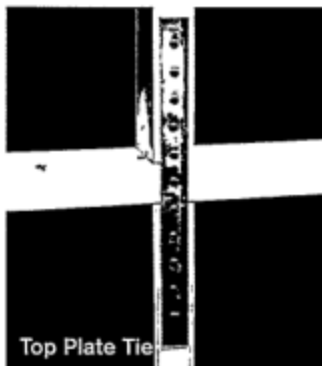

YES! TED'S SHEDS are engineered to comply with the State of Florida Department of Community Affairs (DCA) regulations. The sheds are engineered to withstand wind loads up to 150 m.p.h.!

- Installation includes heavy-duty "mobile home type" anchors.
- Skids are connected with hurricane clips to the floor joists.
- Wall studs are connected with galvanized steel straps to the floor and roof trusses.
- Galvanized steel truss plates are hydraulically installed.

"How will my shed hold up in Florida's climate?"

TED'S SHEDS most popular sheds are specifically designed for Florida's demanding environment. Key factors include:

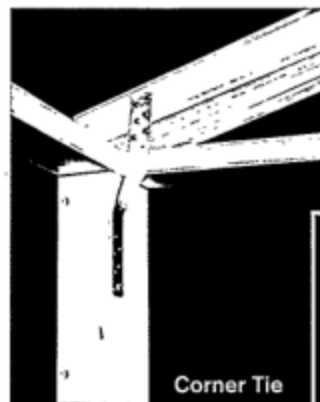

- Aluminum siding is installed with stainless steel screws and **WILL NOT RUST!**
- Exclusive ridge vent, available to release heat through the roof.
- *Mobile Home Door* for a secure fit, - that will not rot or warp.
- Weather-seal around door and foam-seal around the sides and roof, to keep out bugs and blowing rain.
- **Pressure treated** sill plate, flooring, joists and skids to resist bugs and rot.

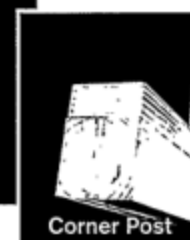

Top Plate Tie

Wall & Truss Tie

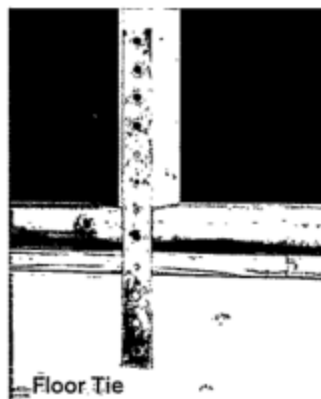

Corner Tie

Corner Post

Hurricane Clips

Floor Tie

"Will my shed require much maintenance?"

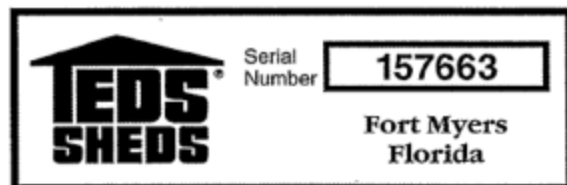

Years of rigorous testing and field experience have led to TED'S SHEDS insistence on low maintenance construction details:

- Concrete foundation blocks, so skids don't contact the ground.
- 3/4" **pressure treated**, tongue and groove "Sturdi-Floor" plywood, **not untreated, poor quality wood covered with paint or copper tox.**
- **Pressure treated** 2" x 4" sill plates.
- Nails, **not staples**, are used to fasten the wood together.
- Maintenance free aluminum siding and roofs, with baked enamel paint available in more than 25 colors!

What is covered by the warranty?

As the oldest portable building manufacturer in Florida, TED'S SHEDS understands the importance of standing behind the product... *and puts that commitment in writing.*

Most importantly, the company has the experience, the resources, and the willing attitude to keep that commitment, and to provide exemplary service, long after delivery and installation of every high quality TED'S SHEDS building.

Building Registration

A metal registration plate, inscribed with the serial number that corresponds to your original purchase documents, is installed on your TED'S SHEDS building, certifying that it is an authentic, quality built TED'S SHEDS product.

Manufacturer's Limited Lifetime Warranty

TED'S SHEDS guarantees its workmanship to be free of defects and its aluminum and paint against corrosion for a lifetime. *It is the only limited lifetime warranty in the industry against corrosion, termites, and decay.*

Confidence in the quality of the product and the desire to maintain customer satisfaction and loyalty allow TED'S SHEDS to offer the most complete warranty in the business.

State Certification

This insignia is issued by the State of Florida Department of Community Affairs (DCA) and certifies that your TED'S SHEDS building complies with the new Florida Building Code. *Manufactured storage buildings that do not bear this insignia cannot be permitted by any Florida building department.*
