The history of the path separator in Japanese and Korean Windows

October 14, 2005

Raymond Chen

Why is the path separator on Japanese Windows the ¥ character? And why is it the ₩ character on Korean Windows? I've been prodding Michael Kaplan to delve into the history of this quirk, and he finally gave in to my repeated badgering. (Additional discussion on the Korean Won sign, the Japanese Yen sign, and currency symbols in general.)
