

Little-known command line utility: clip

 devblogs.microsoft.com/oldnewthing/20091110-00

Raymond Chen

Windows Vista includes a tiny command line utility called `clip`. All it does is paste its stdin onto the clipboard.

```
dir | clip
echo hey | clip
```

For the opposite direction, I use a little perl script:

```
use Win32::Clipboard;
print Win32::Clipboard::GetText();
```
