

Dreaming about games based on Unicode

 devblogs.microsoft.com/oldnewthing/20130422-01

Raymond Chen

I dreamed that two of my colleagues were playing a game based on pantomiming Unicode code points. One of them got LOW QUOTATION MARK, and the other got a variety of ARROW POINTING NORTHEAST, ARROW POINTING EAST, ARROW POINTING SOUTHWEST.

I wonder how you would pantomime ZERO WIDTH NON-JOINER.
