

Geology throwdown: The whisper of the rocks

 devblogs.microsoft.com/oldnewthing/20180329-01

March 29, 2018

Raymond Chen

The *Proceedings of the National Academy of Sciences* is a serious scientific journal, whose published papers undergo rigorous peer review.

This week's issue shows that this doesn't mean that the titles can't be snarky.

Letters (Online Only)

Listen to the whisper of the rocks, telling their ancient story

Paul J. Hearty and Blair R. Tormey

PNAS March 27, 2018. 115 (13) E2902-E2903; published ahead of print March 9, 2018

<https://doi.org/10.1073/pnas.1721253115>

[Add to Cart \(\\$10\)](#)

Reply to Hearty and Tormey: Use the scientific method to test geologic hypotheses, because rocks do not whisper

Alessio Rovere, Elisa Casella, Daniel L. Harris, Thomas Lorscheid, Napayalage A. K.

Nandasena, Blake Dyer, Michael R. Sandstrom, Paolo Stocchi, William J. D'Andrea and Maureen E. Raymo

PNAS March 27, 2018. 115 (13) E2904-E2905; published ahead of print March 9, 2018

<https://doi.org/10.1073/pnas.1800534115>
