Connect and share

Easily integrate your results with your existing solutions and share intelligence with peers and trusted parties.

How it works

We continuously search the open, deep, and dark web to discover customer-specific threat information, using automated technology for speed and scale. We retrieve and deliver this intelligence in a modular format, giving our customers a straightforward way to confront external cyberthreats and manage their digital risk.

Actionable threat intelligence to fight cyberattacks effectively

Our threat intelligence solution enabled one of the world's largest telecomms companies, Telefónica to provide specific, predictive, actionable intelligence to their clients for accelerated decision making. Our Threat Compass solution is easy to deploy, easy to set up, and easy to operate and Telefónica were able to see results in minutes.

 Telefónica

Telefonica

Nikolaos Tsouroulas, Head of Cybersecurity Product Management , Telefonica

“We wanted to go a step further and gain the ability to detect and analyze external cyber threats before they affect clients’ businesses, and we needed a way to turn that ability into a global, scalable service offering.”

Better security posture starts here

Accelerating performance through fast threat detection and dynamic response

- **Detect:** The broadest threat collection on the market, delivered in real-time
- **Analyze:** Actionable and trustworthy information for faster decision-making
- **Respond:** Timely and dynamic intelligence simplifies the remediation process
