reference: <https://reverse.put.as/2020/09/17/evilquest-revisited/>

python implementation for previous sample(s) by Scott Knight

[https://github.com/carbonblack/tau-tools/tree/master/malware\\_specific/ThiefQuest](https://github.com/carbonblack/tau-tools/tree/master/malware_specific/ThiefQuest)

It is able to decrypt a single string or a whole file.

Usage:

```
-f string
    file to decrypt all strings
-s string
    string to decrypt
```
