## **How Amazon employees helped a peer's family escape the war in Ukraine**

Daria Sokol shares her parents' harrowing story of fleeing the war and the way colleagues around the globe supported them with meals, lodging, and kindness. [Learn more.](#)

## **AWS-powered app helps healthcare workers track medical supplies in Ukraine**

The Ukrainian Ministry of Health and Ukraine public health agencies sought a centralized tool that would help doctors, nurses, and other healthcare workers request and track incoming supplies and monitor capacity at nearby hospitals, to better treat the wounded. With support from Amazon Web Services, XCH—a provider of situational awareness and incident management software tools to support health care providers in times of crisis—launched the Ukrainian Humanitarian Aid and Assistance System (UHAAS) to facilitate the communications required to provide emergency responders with real-time data for supply management.
