Global Incident Report: How the Russia Ukraine crisis is impacting cybersecurity

Share

We will update this page with new information as it becomes available.

After a several-month military buildup on Ukraine's borders, on 24 February 2022, Russian President Vladimir Putin sent Russian troops into Ukraine.¹ This offensive also has a cyber component that could potentially affect parties in multiple locations, including Ukraine, NATO countries, and their allies, according to US and UK government assessments.

Accenture's Cyber Threat Intelligence and Cyber Investigation & Forensics Response teams are deeply embedded in the global cyber threat and information landscape, gathering intelligence, monitoring incidents and activities, and developing countermeasures and mitigation strategies. Our latest Global Incident reports, with the most up-to-date and comprehensive analysis, will be continually updated and posted here.
