Our latest report is now out! 📢👉📄 #Kematian Stealer is a PowerShell-based stealer malware tool designed to effortlessly infiltrate and extract data from Windows systems. Despite being open-source and not for financial gain, it was developed by six contributors who participated in the project's release. Kematian Stealer showcases its advanced level with its features and included builder software. 🌐 Our latest technical analysis report examines #KematianStealer in depth. We uncover the tactics, techniques, and procedures (#TTPs) used by Kematian Stealer Developers in their malware. 🔍 We have also provided #MITRE ATT&CK techniques, IOCs, and a #YARA rule for detection to enable organizations to effectively counter this new malware threat. 🔗 Download the #report: <https://lnkd.in/eeakZj9i> #stealer #malware #cyberattack #attacksurfacemanagement #threatintelligence #CTI #cybersecurity #threatmon
